EDUCATION

Ph.D. in Economics

Sciences Po

Paris, France
Fall 2021 – Present

Visiting

University of Chicago

Invitation by Lars Peter Hansen, Fernando Alvarez, and Esteban Rossi-Hansberg

Chicago, USA
Spring 2023

Master's in Economics

Sciences Po – School of Research

Best Master's Thesis, Cum Laude (Top 10%)

Paris, France
2019 – 2021

Master's in International Economics and Development

Université Paris Dauphine

With High Honors

Paris, France
2017 – 2019

Bachelor's in Economics and Business Administration

Université Paris Dauphine

With Honors

Fall 2016: Academic exchange at the University of Oklahoma (Norman, USA), 4.0 GPA

Paris, France
2014 – 2017

RESEARCH FIELDS

Primary: International Macroeconomics

Secondary: Households Finance, Monetary Economics, Geoeconomics

JOB MARKET PAPER

Who Benefits from Capital Market Integration in the Euro Area?

I study how capital market integration redistributes risk and welfare within a monetary union. Using micro data on household portfolios (HFCS) and cross-border holdings (CPIS), I document that participation in risky and foreign assets is highly unequal, and portfolios remain asymmetric between Core and Periphery euro area countries. To interpret these patterns, I build a two-country heterogeneous-agent model in which households differ in financial market participation and countries differ in portfolio composition, calibrated to 2010 euro area data. Capital market integration stabilizes the union in aggregate but amplifies inequality: it benefits asset holders in financially constrained economies and wage earners in capital-receiving regions, while liquidity-constrained households in debtor countries lose. The results highlight a trade-off between aggregate stability and distributional equity in an incomplete monetary union.

WORKING PAPERS

Commodity Prices and Sovereign Risk

with Diego Rodrigues (UQAM) and Venance Riblier (PhD candidate, Sciences Po & UC Berkeley)

Swings in global commodity prices are often associated with higher sovereign risk. Using a shift-share strategy, we show that import-price shocks raise sovereign spreads and reduce borrowing, while export-price shocks have a smaller effect, and tend to reduce spreads. To explain these patterns, we develop a sovereign default model in which a common factor drives global commodity prices. A global price shocks affects sovereign risk through two channels: a price-index channel that raises consumption costs, and a terms-of-trade income channel that shifts real income. Each country is affected differently depending on its trade position. For importers of goods driving global prices, a surge in global prices raises consumption cost more than real income, increasing default incentives and sovereign spreads.

Geopolitical Risk and Inflation Heterogeneity in the Euro Area

with Michele Cattani (PhD student, University of Pavia) and Alejandro Van Ghote (European Central Bank)

Using quarterly data for nineteen euro area countries since 2000, we show that geopolitical shocks raise consumer and producer prices, with stronger and more persistent effects on core inflation. War-related shocks generate inflation through supply-chain disruptions and trade linkages, whereas terrorism-related shocks produce mild, short-lived disinflationary effects. The impact is larger in more open and import-dependent economies. To interpret these findings, we develop a small open economy model and a monetary union model that together reveal how trade exposure, country size, and a common monetary policy shape the transmission of external shocks. In the union, larger and more integrated members amplify spillovers, while smaller or less connected economies remain insulated. Geopolitical risk thus emerges as a structural source of inflationary pressure and heterogeneity, complicating monetary policy in an increasingly fragmented global economy.

Wishing to Work More? Preferences, Constraints, and Hours Worked

with Nicolas Ghio (PhD candidate, Sciences Po) and Mattis Gilbert (PhD candidate, Sciences Po)

Using data from the French Labor Force Survey, we show that 21.2% of workers experience an hours gap, meaning they work fewer hours than they would prefer at their current wage. This stands in sharp contrast to recent evidence from Germany, where most workers report being overworked. In France, hours gaps are concentrated among low-income part-time workers and remain stable over time. We argue that cross-country differences in labor market institutions — including minimum wage policies, working-time regulations, and unemployment insurance — are central to shaping both realized hours and the distribution of hours gaps. While hours gaps appear inefficient in standard labor supply models, they may reflect constrained-efficient outcomes in the presence of frictions. Understanding the mechanisms that generate hours gaps is crucial for evaluating the welfare effects of hours-based policy interventions.

GRANTS, FELLOWSHIPS AND AWARDS

2025 Lamfalussy Fellowship from the European Central Bank (10,000€)	2025
2024 Banque de France Award (10,000€)	2024
Sciences Po Graduate Fellowship	2019 – 2021

EXPERIENCES

Federal Reserve Bank of St. Louis	St. Louis, USA
<i>Dissertation Fellow</i>	Aug. 2025

Banque de France (French Central Bank)	Paris, France
<i>Research visiting as part of 2024 Banque de France Award – European Division</i>	Sept. 2024 – Aug. 2025

European Central Bank (ECB)	Frankfurt, Germany
<i>Summer research graduate programme in honour of Ivan Jaccard</i>	May – Aug. 2024

International Monetary Fund (IMF)	Washington, USA
<i>Fund Internship Program (FIP) – Strategy, Policy, Review Division</i>	June – Sept. 2022

Organisation for Economic Cooperation and Development (OECD)	Paris, France
<i>Research assistant – Public Economics Division</i>	May – Aug. 2020

French Ministry for the Economy and Finance (Directorate-General of the Treasury)	Paris, France
<i>Intern – Economic and Monetary Union Unit</i>	May – Aug. 2019

Banque de France (French Central Bank)	Paris, France
<i>Research assistant – International Macroeconomics Division</i>	Jan. – May 2019

SEMINARS & WORKSHOPS

2025 First BDF-EUI Joint European Workshop, online (discussant); **20th Doctorissimes**, Paris School of Economics (France); **ESADE Macro Meetings 2025** (Spain); **2nd Beta Workshop on DSGE**, Strasbourg (France), **T2M**, CREST (France); **Trans-Atlantic Doctoral Conference**, London Business School (UK); **HEC Economics PhD Conference** (France); **Vigo Workshop on Dynamic Macroeconomics** (Spain); **Ph.D. Dissertation Fellows Workshop**, Federal Reserve Bank of St. Louis (USA); **EEA 2025**, Bordeaux (France); **Can Heterogeneous Agent Models Be Useful for Central Bankers? How?**, Bank of England (UK) (poster session).

2024 **ADRES Job Market Conference**, ENS Paris-Saclay (France); **GAINS External Seminar**, Le Mans Université (France); **Heterogeneous Agents in Macroeconomic Models Workshop**, Czech National Central Bank (Czech Republic) (poster session); **Sciences Po Summer Workshops in Economics** (France); **ECB DG-Research Internal Seminar** (Germany); **ECB Research Task-Force on Heterogeneity Workshop** (Germany); **Journal of International Economics Summer School**, University of Oxford (UK) (poster session); **MFR Summer Session**, University of Chicago (USA) (poster session); **ECB Mini-Workshop on Household Economics** (Germany); **Banque de France Internal Seminar** (France); **RIEF Network**, Université Paris Dauphine (France); **DebtCon7 Emerging Scholars Session**, Paris School of Economics (France).

2023 **Workshop on Climate, Macroeconomic Uncertainty and Policy**, University of Chicago (USA); **9th IMAC Workshop** (France); **Bordeaux School of Economics External Seminar** (France).

2022 **Heterogeneous-Agent Macro Workshop**, NBER, Cambridge (USA).

TEACHING

Public Economics, Graduate Teaching Assistant (6 groups) *Fall 2024, 2025*
Prof. Pierre Cahuc and Prof. Antoine Ferey, Sciences Po, School of Public Affairs

Macroeconomics II (Ph.D. Track), Graduate Teaching Assistant *Spring 2022, 2023, 2024*
Prof. Jean Barthélemy, Sciences Po, School of Research

Understanding the World Economy, Graduate Teaching Assistant *Spring 2022, 2023, 2024, 2025*
Prof. Nicolas Coeurdacier, Sciences Po, School of Management and Innovation

Understanding Economic Fluctuations, Graduate Teaching Assistant *Fall 2021, 2022, 2023, 2025*
Prof. Nicolas Coeurdacier, Sciences Po, School of Management and Innovation

Managerial Economics, Graduate Teaching Assistant *Fall 2020, 2021*
Prof. Michele Fioretti, Sciences Po, School of Management and Innovation

Economics and Law, Graduate Teaching Assistant *Fall 2024*
Prof. Roberto Galbiati, Sciences Po, School of Public Affairs

NON-ACADEMIC PUBLICATIONS

What are the financial risks to euro area growth? *May 2019*
Banque de France Eco Notepad, with Laurent Ferrara, Matteo Mogliani and Jean-Guillaume Sahuc

OTHER SKILLS

Languages: French (native), English (fluent), Italian (intermediate)

Programming: Matlab, Dynare, Julia, R, LaTeX, LyX (proficient); Python, Eviews, SAS, Stata (intermediate)
